If you have any comments on the teacher, please enter them here - Artur Dos...

Artur has been the most helpful in explaining the Maths concept that were poorly explained in the lectures.

Really helpful! He clarifies all the concepts that were covered in the Math Lecture with much better explanations.

He should have been allowed to conduct the Math Lectures too. He was that good.

Those classes should be the core of math-prep module! More hours and more problems.

Artur did a great job and really tried to make everyone understand the covered material.
